

NGO Norway

Description

[ASO] Society Online Association generated a relevant Romanian civil society online platform in 2011: contributors.ro.

Contributors.ro is based on a large community of authors who want to assign and share their experience and knowledge. We promote excellency in publishing relevant analyses and opinions from top Romanian experts, academics or intellectuals covering politics, economics, education, foreign affairs and culture. The association supports most relevant civil society debates through mass-media dossiers, thematic books, seminaries, round-tables, interviews via Hotnews.ro, an independent and popular (daily users 350.000) daily journal partner.

Competence and Expertise Offered

More than six hundred authors contributed to our platform generating a manifold competence and expertise for a very wide public. We bring some relevant European, SEE, US (about Romania) issues: energy, politics, human rights, education, climate change, history (i.e. Holocaust, WW II, minorities, law and others), contemporary ethics, mass-media etc.

Expertise sought

ASO aims to combine the expertise of all its contributors on the online platform contributors.ro with those of other associations of the same profile, expanding their experience towards possible projects to be carried out in Romania.
